

Midland G8E-BT

PMR446 transceiver

Cod.C975

uk

Midland G8E-BT is the BRAND NEW PMR446 transceiver with built-in Bluetooth module that can be used with other Intercom headsets or devices of the Midland BT line, especially designed for wireless communications in group situations and while riding.

Being a practical and useful communication device, Midland G8E-BT meets the requirements of the most demanding users.

The built-in Bluetooth module allows pairing with other Bluetooth systems eliminating the need for wired headsets.

G8E-BT is equipped with a wired PTT box to apply to the handlebar of your bike or motorbike so you can stay in touch with your friends while riding,
